

Multi-temporal risk analysis

John P. Hewlett, University of Wyoming

Dr. Jay Parsons, University of Nebraska

Tool Description

- The Multi-Temporal Risk Analyzer (MTRA) Tool is designed to provide economic analysis of multi-year management strategies and decisions involving risk.
- Examples include: investment decisions, changes in production practices, adding and subtracting enterprises, and other decisions that involve multiple years to come to fruition or a multi-year commitment in order to see a positive economic return.
- The MTRA tool uses a partial budget as its baseline for entering data reflecting the decision to be analyzed.

Partial Budget

- A partial budget is a simple financial tool used to analyze simple changes to your operation.

- Positive Effects

- Added Returns
- Reduced Costs

- Negative Effects

- Added Costs
- Reduced Returns

The MRTA tool incorporates the ability to define some or all of the input values as uncertain numbers in any year analyzed creating a more thorough understanding of possible outcomes if the change is implemented.

Case 1: Equipment Purchase Decision

Proposed Change:		Interest Rate: 5.00%		~ Check the boxes below for year(s) affected by the pr													
Windrower Purchase	Most Likely VALUE	Expected Low/High Value		Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year
				1	2	3	4	5	6	7	8	9	10	11	12	:	
Added Returns																	
Custom work	\$ 7,215	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 8,658 High	None ☐														
Salvage value	\$ 30,000	\$ 20,000 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 40,000 High	None ☐														
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐														
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐														

- Added Returns include:
 - Possible income from custom work
 - The salvage value of the windrower after 10 years
- Both of these involve considerable uncertainty

Case 1: Equipment Purchase Decision

Reduced Costs																	
Custom windrowing expense	\$ 13,500	\$ 13,500 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 13,500 High	None ☐														
Custom windrowing expense	\$ 14,850	\$ 13,500 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 16,335 High	None ☐														
Custom windrowing expense	\$ 16,335	\$ 13,500 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 18,000 High	None ☐														
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐														

- Reduced costs would be the savings realized from not having to pay someone to custom windrow their hay.
- Uncertainty around this cost can be customized over the course of the ten year planning horizon to reflect anticipated increases over time.

Case 1: Equipment Purchase Decision

Added Costs									
Loan payments	\$ 23,097	\$ 23,097	Low	All	☒	☒	☒	☒	☒
		\$ 23,097	High	None	☒	☒	☒	☒	☒
Operating costs (labor, fuel & repairs)	\$ 4,362	\$ 4,362	Low	All	☒	☒	☒	☒	☒
		\$ 4,362	High	None	☒	☒	☒	☒	☒
Taxes, housing, and insurance	\$ 1,000	\$ 1,000	Low	All	☒	☒	☒	☒	☒
		\$ 1,000	High	None	☒	☒	☒	☒	☒
	\$ -	\$ -	Low	All	☒	☒	☒	☒	☒
		\$ -	High	None	☒	☒	☒	☒	☒

- Added costs would include:
 - Loan payments on the purchased windrower
 - Operating costs for the windrower
 - Taxes, housing, and insurance costs on the windrower

Case 1: Equipment Purchase Decision

Proposed Change: Windrower Purchase

ANNUAL RETURN: PV-basis Cumulative Probability Distribution, Single-Draw and Multi-Draw Graph

Case 1: Equipment Purchase Decision

Case 2: Pasture Improvement Decision

- Rex and Sara Timber currently manage a 1280-acre pasture as a single unit. The pasture has a water source at the north end and is fenced around the perimeter.
- Their normal practice is to graze 400 yearling steers in the pasture for a period of 2.5 months from June 15 to August 31 each year. The starting weight for the steers is around 550 pounds and the ending weight is usually about 660 pounds.
- The Timbers are considering making some improvements to the pasture infrastructure in order to increase the carrying capacity.

Case 2: Pasture Improvement Decision

- Specifically, they are considering cross fencing the pasture into four equal quadrants and extending a water line from an adjacent pasture into the new 4-pasture unit with a tank in each of the four pastures.
- The improvements would involve the following:
 - The installation of four miles of buried water line and four water tanks; and,
 - The construction of three miles of 4-wire cross fencing.
- The Timbers estimate that the water development and cross fencing will allow them to increase the carrying capacity to about 460 head of steers over the same grazing period while maintaining the same average ending weight of around 660 pounds.

Case 2: Pasture Improvement Decision

Item	Cost
Annual perimeter fence and water maintenance	\$400
Annual depreciation of perimeter fence	\$325
Annual labor hours per steer w/out cross fencing	0.2
Average land value per acre (current)	\$700
Annual property taxes per acre (current)	\$3.40
Cross fencing materials and installation per mile	\$8,550
Cross fence annual repairs and maintenance	\$225
Cross fence useful live	35 years
Waterline installation	\$27,750
Water tanks (\$/tank)	\$3,000
Tank & waterline annual repairs and maintenance	\$100
Tank & waterline useful life	20 years
Annual labor hours per steer with cross fencing	0.3
Annual property taxes per acre with proposed improvements	\$3.65
Wage rate per hour	\$20
Interest rate on investments	8%

Case 2: Pasture Improvement Decision

Proposed Change:		Interest Rate: 5.00%		~ Check the boxes below for year(s) affected by the proposed changes ~																			
Pasture Improvement	Most Likely VALUE	Expected Low/High Value	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year	Year
Added Returns																							
60 additional head of steers	\$ 14,100	\$ - Low \$ 18,330 High	AF	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
	\$ -	\$ - Low \$ - High	AF	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low \$ - High	AF	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low \$ - High	AF	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low \$ - High	AF	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

- Added Returns would result from being able to run 60 additional head of steers over the same grazing period each year
- However, this involves considerable uncertainty

Case 2: Pasture Improvement Decision

Reduced Costs													
Current water source maintenance cost	\$ 175	\$ 175 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 175 High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
	\$ -	\$ - Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ - High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

- Reduced costs would result from not having to maintain their current water source
- This doesn't involve any uncertainty

Case 2: Pasture Improvement Decision

Added Costs													
Capital Improvements (fence & water) dep.	\$ 3,270	\$ 3,270 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 3,270 High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Interest	\$ 3,516	\$ 2,800 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 4,395 High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Annual labor, repairs & maintenance	\$ 1,485	\$ 1,053 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 1,992 High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Property taxes	\$ 320	\$ 320 Low	All ☒	☒	☒	☒	☒	☒	☒	☒	☒	☒	☒
		\$ 320 High	None ☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

- Added costs would include:
 - The investment in the capital improvements
 - Additional interest expense associated with the capital improvement investment and with buying 60 more head of steers to graze
 - Increased labor, repair & maintenance expenses
 - Increased property taxes

Case 2: Pasture Improvement Decision

Proposed Change: Pasture Improvement

Conclusion

The Multi-temporal Risk Analysis tool:

- Can be a useful tool for analyzing multi-year management strategies and decisions involving risk.
- Represents a better way to handle the presence of uncertainty by thinking in terms of distributions of possible outcomes over time.
- Results in a more informed decision-making.

Multi-Temporal Risk Analysis
